

# Trustmark Critical Illness Insurance

Providing a financial cushion for when you need it most.

## Helping pay for what health insurance doesn't

A serious illness can be hard on more than just your health: it can threaten you and your family's **financial stability**. Even with medical insurance, you may have out-of-pocket payments and other **new major expenses**. You might even have less income to cover these costs.

**Critical Illness insurance can help.**

Critical Illness insurance pays a **lump sum of cash** directly to you when you are diagnosed with a covered illness - use it for whatever you need.

With Critical Illness insurance, if you are affected by a major illness, you can **focus on your health** with less worry about your wallet.

## Critical Illness sample rates

Sample ranges of weekly rates for employee-only, non-tobacco coverage. Your exact rate may depend on additional features selected by you and/or by your employer.

Age at purchase	\$15,000 policy
30	from <b>\$3.00*</b> - <b>\$4.19</b>
40	from <b>\$3.70</b> - <b>\$6.08</b>
50	from <b>\$6.73</b> - <b>\$11.31</b>

Sample base rates are shown for illustrative purposes only. Rates may vary by age, tobacco use, state, employer and features selected by you and/or by your employer. An application for insurance must be completed to obtain coverage. \*Minimum weekly premium is \$3. Benefit will be adjusted up if \$3 purchases more than \$15,000 in benefit.

**Note: once you have a policy, your rates will not increase due to age.**

<sup>1</sup> Most states define eligibility as first diagnosis, meaning the first time a physician identifies a covered condition from its signs or symptoms. If you've been diagnosed with a covered condition prior to having coverage, you may not be eligible for a benefit. <sup>2</sup> Please consult your policy/group certificate for specific covered conditions. <sup>3</sup> If the insured receives the 25% benefit for coronary artery bypass surgery or carcinoma in situ, the remaining benefit will be available for a diagnosis of another covered condition or subsequent benefit, if included. Most skin cancer is excluded.

Cardiovascular disease and stroke cost Americans more than **\$316 billion** in direct and indirect costs annually.<sup>4</sup>

More than a **quarter of adults in the U.S.** say health care costs have caused them a serious financial problem in the last two years.<sup>5</sup>
